SOLIDARITY PASSPORT

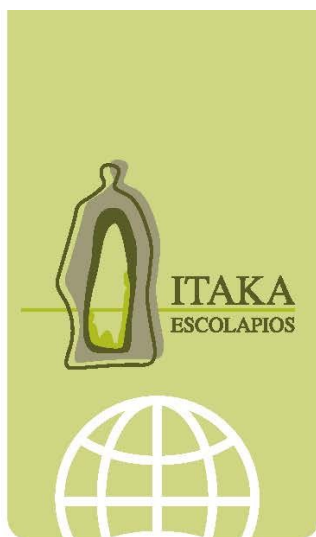

This solidarity passport aims to make our identity visible as citizens of the world. Turn solidarity into one of the cores of our identity beyond borders, nationalities and colors.

Each class will have a passport copy that will be personalized by adding the timely information of each person attending the classroom.

It is a living document, in which we will gather among all, the different activities carried out within the framework of the annual solidarity campaign that Itaka Escolapios promotes in Piarist schools in different countries.

The passport will serve as a log of our journey through international solidarity. Each year we will add new information about the campaign, accumulating information and documentation of the different Piarist realities in the world.

Enjoy the trip!
